

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Includes: The tonnage of Ships entered and cleared in the Lake and River trade between Canada and the United States.

This decrease was due to a foreign line of steamers not touching at Seychelles as in former years.
The figures given for 1904 and 1905 represent the shipping of Australia with places outside the Commonwealth—the figures having been compiled for the first time by the Federal Government in 1904, and not by each State as in former Commonwealth figures (i.e., excluding inter-State shipping) for years prior to 1904 cannot be given for the Commonwealth as, in vessels trading with more than one State from or to places outside the Commonwealth were, as a rule, included in the tonnage of each of those States.

Including tonnage from 1898 inclusive.
This decrease was partly due to the plague in New South Wales.
The 15 months ended 31st March 1904.

The figures for 1905 and prior years represent the tonnage of vessels entered and cleared, with cargo only.
Including transports carrying stores, but excluding those conveying troops from 1899 inclusive.

It is stated in the original Commonwealth Trade Returns for 1904 that "prior to September 1st 1903, it was not the practice in the various State Customs Offices to record transhipments. It follows that goods arriving from beyond the Commonwealth at any Australian port and thence transhipped to another State were recorded in the State in which they ultimately arrived as an import from the transhipping State, and not, as they are now, as an overseas import. The figures shown above represent the estimated value of such transhipments, and must be added to the recorded imports to obtain the true gross import from Countries beyond the Commonwealth."

Note.—Particulars for years prior to 1899 for the Australian Commonwealth as a whole cannot be stated in the original returns that the above statement is to be taken as accurate only so far as the data are concerned. In the preceding years the articles have been classified as nearly as possible on the basis as in later years, but this has been found a matter of great difficulty, owing not only to the non-uniformity in the classifications of articles in the various States, but also to the differences between 1903 and previous years.

(a) It is noted in the original Commonwealth Trade Returns for 1904 that "prior to September 1st 1903 it was custom in most of the States for goods of local produce despatched from one Australian State to another for shipment beyond the Commonwealth to be recorded only as inter-State transfers from the original State, no account being taken of the overseas export. The present practice is to count such goods as being exported from the State where they are actually placed on board overseas vessels so as to avoid the possibility of transshipment being made at the place of production and at the place of final export." No reliable estimate of the values of overseas produce prior to September 1st 1903 can be given, but in 1904 they amounted to 2,555,128*l*.

In August, 1903, this Tariff was superseded by the *British Preferential Tariff*, which confined the benefits to goods (except alcoholic liquors, tobacco, and, in certain cases, sugar) the produce or manufacture of the United Kingdom and certain British Possessions when imported direct, and a reduction of 3th of the general duty was allowed to the 30th June, 1900, and 3rd of the duty after that date. Preferential Treatment was extended to South African products from 1st July, 1904. Under Act No. 11 of 1904, there were slight amendments of the preference allowed on woollens, cordage, china ware and common window glass from June 7th, 1904.

Under Act No. 15 of 1903, articles which are the growth, produce, or manufacture of Germany, were, from April 17th, 1903, subject to a surtax of 3rd of the duties charged under the General Tariff.

NOTES.—For rates of exchange, see Table No. 2, p. 5.

An Enactment was passed in each of the Federated Malay States in 1904, which provided for the Registration of Imports and Exports.

(a) The Perak returns of exports are defective as regards timber and firewood—more particularly prior to 1897.

(b) In 1895 a confederation of the States of Sungai Ujong and Jelebu with the State of Negri Sembilan was formed under the title of Negri Sembilan.

(c) The returns of imports and exports by sea are for the principal ports only. Overland trade is excluded for the years 1892 to 1893; in later years it is partially included.

(d) Including "Gold, (cyanide)" and "Gold concentrates," after the year 1898.

(e) It is stated in the original returns that the value of the imports into Pahang for 1899 is probably over-estimated, as a large quantity of goods of which the real value was unknown, was arbitrarily valued at \$450,000.

For rates of export duty on tin and tin ore, see Table No. 16, p. 419.

The Possession of *British New Guinea* was declared to be a Territory under the authority of the Australian Commonwealth, and to be known by the name of the "Territory of Papua" by the Papua Act of 1905, which was brought into force by a Proclamation issued by the Commonwealth Government on September 1st, 1907.

in accordance with the provisions of the "Commonwealth of Australia Constitution Act, 1900," the Customs, Excise, and Revenue Departments of each State were transferred to the Commonwealth Government in 1901. The above gives of such Revenue as is collected by the Commonwealth Government from that date. (j) Including savings Bank Investments in 1903 and later years. (k) Excluding an Imperial grant of 10,000, for telegraph.

(l) The increased revenue was mainly due to the inclusion of railway receipts, the railway being transferred to Government during the year. (m) Exclusive of Imperial grants. (n) Including, for St. Lucia from 1896 and 1898, amounts received from municipal authorities and the Immigration Fund for the payment of interest on principal of loans guaranteed by the Colony. (o) For nine months ended 31st December, 1905. (p) Including proceeds of 68,828, in 1905-6, and 221,375, in 1906-7. (q) Exclusive of Head Office Revenue of the British South Africa Company.

(r) The reduced revenue is due to an alteration in the manner of showing the earnings and working of the State railways. For the first time, the net receipts of the railways are shown under Revenue, the working expenses from the total earnings instead of being entered on the expenditure side as hitherto.

See only. The tonnage of Ships entered and cleared in the Lake and River trade between Canada and the United States follows:—

1900.	1901.	1902.	1903.	1904.	1905.	1906.	North America: Dominion of Canada (c).
282,374	11,486,746	15,293,916	17,813,868	15,375,500	16,689,365	17,888,743	

The decrease was due to a foreign line of steamers not touching at Seychelles as in former years.

The figures given for 1904 and later years represent the shipping of Australia direct with places outside the Commonwealth the shipping returns having been compiled for the first time by the Federal Government in 1904, and not by each State in former years. Comparative figures (i.e., excluding inter-State shipping) for years prior to 1904 cannot be given for the Commonwealth as a whole, as vessels trading with more than one State from or to places outside the Commonwealth were, as a rule, included in the returns of each of those States.

* Including transports from 1899 inclusive.

† The decrease was partly due to the plague in New South Wales.

‡ For the 15 months ended 31st March 1904.

§ The figures for 1892 and 1893 represent the tonnage of vessels entered and cleared, with cargoes on'y.

|| Including transports carrying stores, but excluding those conveying troops from 1899 inclusive.

¶ The Colony and Protectorate of Southern Nigeria were placed under the same administration from May 1st 1906, and the shipping returns for both the Colony and the Protectorate are now amalgamated—the trade between the Colony and Protectorate being treated as Coasting Trade.

Government Stores. (e) The figures for the various South African Colonies for 1906 have been extracted from the compiled by the South African Customs Statistical Bureau. The total represents the value of imports, by British South Africa as a whole, from places outside British South Africa. For details *via* various routes, see p. 404. (f) Inclusive of the value of goods in transit for the interior. (g) See note (u) on p. 25. (h) Including transit imports in years prior to 1904-5. (i) Including transshipments in years prior to 1900-1. (j) Excluding the trade of Karam in years prior to 1902-3. (k) Including Inter-Presidency trade. (l) Excluding Inter-State transshipments imports prior to September 1st, 1903. See note (a), p. 85. (m) Excluding Government Stores and Treasure. (n) Increase is largely due to the fact that during 1905-6 Trinidad was temporarily the transshipping centre for Royal Dutch. (o) It is stated that the imports into Northern Nigeria are entered *via* the Colony and Protectorate of Nigeria.

Note.—Particulars for years prior to 1899 for the Australian Commonwealth as a whole cannot be given. It is stated the original returns that the above statement is to be taken as accurate only so far as the years 1902 to 1906 concerned. In the preceding years the articles have been classified as nearly as possible on the same basis in later years, but it has been found a matter of great difficulty, owing not only to the want of uniformity in the classification of articles in the various States, but also to the differences in classification between 1902 and previous years.

(a) It is stated in the original Commonwealth Trade Returns for 1904 that "prior to September 1st 1903, it was not the practice in the various State Customs Offices to record transshipments. It follows that goods arriving from beyond the Commonwealth at any Australian port and thence transhipped to another State were recorded in the State in which they ultimately arrived as an import from the transshipping State, and not, as they are now, as an overseas import. The figures shown above represent the estimated value of such transshipments, and must be added to the recorded imports to obtain the true gross import from Countries beyond the Commonwealth."

Note.—Particulars for years prior to 1899 for the Australian Commonwealth as a whole cannot be given. It is stated in the original returns that the above statement is to be taken as accurate only so far as the years 1903 to 1906 are concerned. In the preceding years the articles have been classified as nearly as possible on the same basis as in later years, but this has been found a matter of great difficulty, owing not only to the want of uniformity in the classifications of articles in the various States but also to the differences in classifications between 1903 and previous years.

(a) It is stated in the original Commonwealth Trade Returns for 1904 that "Prior to September 1st 1903 it was the practice in most of the States for goods of local produce despatched from one Australian State to another for transshipment beyond the Commonwealth to be recorded only as inter-State transfers from the original State, no notice being taken of the overseas export. The present practice is to count such goods as being exported from the place where they are actually placed on board overseas vessels so as to avoid the possibility of transshipment being treated as exports at the place of production and at the place of final export." No reliable estimate of the values of these transshipments prior to September 1st 1903 can be given, but in 1904 they amounted to 3,655,128l.

(b) Exclusive of the value of goods shipped as ship's stores in Australian ports on board vessels bound for overseas countries (valued at £275,966), which was included in years prior to 1906.

In August, 1898, this Tariff was superseded by the *British Preferential Tariff*, which confined the benefits to goods (except alcoholic liquors, tobacco, and, in certain cases, sugar) the produce or manufacture of the United Kingdom and certain British Possessions when imported direct, and a reduction of 1/3 of the general duty was allowed to the 30th June, 1900, and 1/3 of the duty after that date. Preferential Treatment was extended to South African products from 1st July, 1904. Under Act No. 11 of 1904, there were slight amendments of the preference allowed on woollens, cordage, china tableware and common window glass from June 7th, 1904.

Under Act No. 11 of 1907, which came into force on November 30th, 1906, the Customs Tariff was revised, whereby varying rates of preferential duties were accorded to various United Kingdom and Colonial products.

Under Act No. 15 of 1903, articles which are the growth, produce, or manufacture of Germany, were, from April 17th, 1903, subject to a surtax of 1/3 of the duties charged under the General Tariff. This surtax was continued by the Customs Tariff Act No. 11 of 1907.

(f) The Colony and Protectorate of Southern Nigeria were placed under the same administration from May 1st, 1907, and the returns were amalgamated for 1906.

(g) The figures include the Domestic Exports of "Balata Gum."

(A) The Ceylon Government state that these figures may include rubber previously imported from the Straits Settlements and China and re-exported.

(a) Practically all the Indian jute is produced in the Province of Bengal, a little being grown in Assam, Cooch Bihar and Nepal. It is stated that the area under jute in Bengal is based on very uncertain data, but special efforts were made in 1904 to obtain correct estimates.

(b) There are practically no Exports of raw jute from British India by the land frontiers.

The figures given in italics represent domestic exports, as production figures are not available.

For particulars of gold exported from each of the Federated Malay States, see Table No. 3, pp. 412 of *sup.*

(a) The figures for 1902-6 represent the quantity of fine gold produced in the whole of the Transvaal. For prior years, the figures for the Witwatersrand Fields only are given—the production of which amounted to 1,600,101 ozs. in 1902.

(b) Gross weight.

PREFERENTIAL TREATMENT is accorded to CERTAIN GOODS, the GROWTH, PRODUCE, or MANUFACTURE of the UNITED KINGDOM and various BRITISH POSSESSIONS when imported into the under-mentioned COLONIES :—

COLONY.	Under the British Preferential Tariffs.
	Preferential treatment accorded goods—the produce or manufacture of the

() A surtax of one-third of duties leviable under the General Tariff is imposed upon German goods imported into the Dominion of Canada.

A special (or dumping) duty equal to the difference between the selling price of the article for export and the fair market value of the same for home consumption—but not to exceed 15 per cent. ad val.—is imposed on all “under-valued goods” of a class or kind made in Canada except in the case of :—

- (a) Goods whereon the duties are equal to 50 per cent ad val.;
- (b) Goods of a class subject to excess duty in Canada;
- (c) Sugar refined in the United Kingdom;

RES.—For rates of exchange, see Table No. 2, p. 5.

Enactment was passed in each of the Federated Malay States in 1904, which provided for the Registration of Imports and Exports.

The Perak returns of exports are defective as regards timber and firewood—more so prior to 1897.

In 1895 a confederation of the States of Sungai Ujong and Jelebu with the State of Negri Sembilan was formed under the title of Negri Sembilan.

The returns of imports and exports by sea are for the principal ports only. Overland trade is included for the years 1892 to 1898; in later years it is partially included.

Including "Gold, (cyanide)" and "Gold concentrates," after the year 1898.

It is stated in the original returns that the value of the imports into Pahang for 1899 is probably over-estimated, as a large quantity of goods of which the real value was unknown, was arbitrarily valued at \$450,000.
